Volodymyr Dobrovolskyy

Full-stack web developer

(Python/Django + Vue.js)

dobrovolskyy.vladimir@gmail.com
skype: vladimir_acc@outlook.com
web: vladimir-dobrovolsky.github.io

PROFILE

Experienced Full-stack web developer with a background in digital marketing. Knowledgeable in all stages of product creation: from idea to launch and beyond. Able to understand what the client needs from a marketing standpoint and how to do it from a developer's.

EXPERIENCE

2021 — NOW: A MARKETPLACE FOR HIRING IT PROFESSIONALS.

Implemented business logic and ideas mostly via Django REST Framework and ElasticSearch as a Python backend dev in a team.

2019 — NOW: ONLINE PRESENCE FOR A PUBLISHER/CONSULTING COMPANY.

The project has grown from a basic landing page to a journal publisher's main digital product with 32k users over the course of 2.5 years. Being a sole developer, I've communicated directly with stakeholders and helped them bring their (and some of mine) ideas to life. Besides coding, I've provided SEO optimization, marketing tools and UI/UX design.

< 2019

Various projects as a full-stack web developer primarily on Django + Vue.js. Details available upon request.
